

INTEGRATION

Services

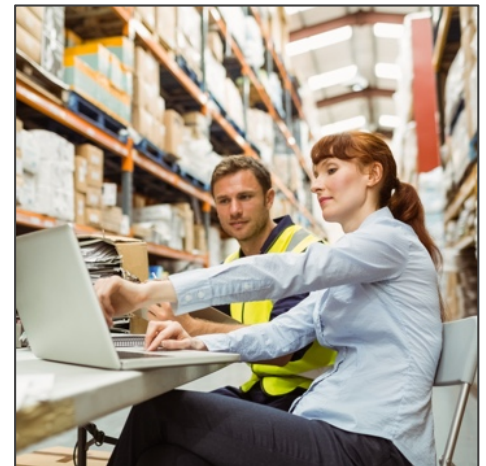

Connecting Your Business Applications

Integration includes us connecting systems together so they talk to each other. For example, integrating an accounting system to Dynamics 365 to allow flow of data. There is no limit on what we can achieve as long as its cloud based and has an API.

Your business wouldn't already be this successful if you didn't have some great systems in place, and we understand that you may want to keep some of these systems – Vinergy are experts in removing any Silos in businesses and making your applications talk with each other.

We can provide integrations to :

- Accounting and Finance Systems
- Maps
- Currency exchange
- Microsoft Solutions
- Payment Gateways
- And Many Many More...

Integrating the applications you use everyday can provide your business with transparency, flow of data and visibility enabling you to make informed business decisions.

Microsoft's Flow (part of the Power Platform) can help you connect applications together with ease.

The Vinergy Difference

- We are local and like-minded – we too are business owners and decision makers.
- Our team is experienced, knowledgeable and competent.
- Our approach is non-corporate, non-jargon professionalism.
- We are proactive, responsive and accountable.
- You will have a single point of regular contact.

Our 5 Point Customer Promise

1. We will treat your business as if it were our own
2. We will keep your business running
3. We will make your life easier
4. We will allow you to focus on what you do best
5. We will make your business smarter, stronger and help it to grow faster.
